## PROJECTS

### RideEasy – E-commerce Rental Platform

MERN Stack, TypeScript, Redux, JWT

⌚ 2026 - Present

- Architected a comprehensive rental ecosystem with a centralized dashboard, significantly reducing data latency through Redux Toolkit state management.
- Secured the platform using JWT authentication and protected routes, maintaining total data integrity for all user transactions and business records.

### EasyInvoice – Mobile Billing Solution

React Native, Firebase, Expo, TypeScript

⌚ 2025 - Present

- Architected a mobile app for offline PDF invoice generation, reducing server dependency.
- Merged Firebase Auth and real-time Firestore syncing for cross-session data integrity.

### Ceylon Antique Marketplace

Spring Boot, MySQL, SMTP

⌚ 2025 - Present

- Developed a full-stack antique marketplace platform using Spring Boot and MySQL, implementing secure JWT authentication, payment integration, admin management, and automated email notifications.
- Engineered a high-performance Spring Security backend with database pagination to handle thousands of concurrent listings without performance degradation.

## SUMMARY

Versatile Full-Stack Developer and UI/UX Designer with a dual-focus background in Computer Science and IT. Expert at building end-to-end digital products, from high-fidelity Figma prototyping to scalable backend architectures using Spring Boot and the MERN stack. Specialized in bridging the gap between aesthetic design and robust software engineering to deliver seamless, accessible user experiences.
